### Description

Since its introduction in the early 1990's, the Genesis EP thin plate pure lead (TPPL) battery has established itself as a premium high performance battery suitable for a wide range of demanding applications.

Today, Genesis EP TPPL technology can be found in applications as diverse as electronics, medical equipment, telecommunications, lawn and garden equipment, computer backup and UPS applications. The TPPL technology allows the battery to pack more power into a smaller footprint. The EP brand also offers deep cycling capabilities, fast recharge abilities and a non spillable design which allows mounting in any position except inverted.
